1. Gross and net fixed domestic capital formation and depreciation	
2. Stocks	
3. Overseas lending and net grants from abroad	
Taxes on Expenditure, Rates and Subsidies	
Output and Price Indices	

Prise de Vues sur la Croissance de l'Économie Française,
1780-1950

par FRANÇOIS PERROUX

	<i>page</i>
I. Propos de Départ: 'Croître' et 'Ce qui Croît'	41
1. Les augmentations de la dimension d'une unité économique	
2. Les changements de structures	
3. Les changements dans les types d'organisation	
4. Les progrès, repérés par des indicateurs multiples	
II. Les Rythmes de Croissance	
1. Servitudes des 'déflations' et repérages d'histoire raisonnée	46
a) Les allures des séries nominales	
b) Les allures des séries après déflation	
c) Les mouvements des prix et les allures des séries	
2. Limites du calcul des taux et contenu des phases	
a) Marges d'incertitudes et calcul des taux d'accroissement	
b) Concomitances économiques et phases	
III. Les Changements de Structures	60
1. Changements dans la structure du produit	
2. Changements dans la structure de la fortune privée	
3. Changements dans la proportion des catégories de revenus	
IV. Les Changements dans les Types d'Organisation	66
V. Les Progrès et leurs Symptômes	69
VI. Propos d'Etape	73

The Long-Term Growth of National Income in Germany

by PAUL JOSTOCK

	<i>page</i>
I. Introductory Note on the Development of German Income Statistics	79
II. Total National Income	80
1. General comments on the method of estimation	
2. Biases of inter-temporal comparisons caused by structural changes	
(a) Shifts between urban and rural population	
(b) Changes in the age distribution of the population	
(c) Expansion of unproductive activities	
(d) Rearmament and the production of war material	
(e) Territorial changes	
3. Aggregate national income	
III. Per Capita Income	93
1. The growth of population and income	
2. Effect on purchasing power of income of population shifts to urban areas	
3. Value of the increase in leisure	
IV. National Income per Gainfully Engaged Person	100
V. Distribution of the National Product by Industrial Origin	104
VI. Distribution of National Income by Type and Size of Income	107
1. Income of entrepreneurs and income of employees	
2. Size of income	
Appendix: Sources and Methods	118
1. Estimates for 1860-90	
(a) Agriculture	
(b) Industry	
(c) Other Sectors	
2. National Income Estimates for 1890-13 and 1925-41	

The National Product of Denmark, 1870–1952

A Summary of Estimates prepared in the Statistical Department

by *KJELD BJERKE*

	<i>page</i>
Part A. Summary and Analytical Tables	123
Part B. Description of Method and Basic Reference Tables	133
I. The Industrial Breakdown	133
1. Agriculture	
2. Non-agricultural industries	
1870–1920	
1921–29	
1930–52	
3. Deflation	
4. The labour force	
5. Working hours	
II. Break-down of Consumption, Investment, Export Surplus and Saving	140
1. Imports, exports and net deficit on the balance of payments current account	
2. Gross investment	
(a) Building	
(b) Construction	
(c) Machinery and equipment	
(d) Means of transport	
3. Depreciation	
III. Basic Reference Tables	146

National Income and Capital Formation in Hungary

by *ALEXANDER ECKSTEIN*

I. Introduction	152
II. National Income, 1900–49	153
1. The scope and character of national income work in Hungary	
2. National product and its composition, 1900–49	
3. National product, in constant prices, 1900–49	
4. Rates of growth, 1900–49	

III. Long-term Trends in Occupational Distribution and Labour Productivity	179
1. Methodological problems in the measurement of Hungary's occupational distribution	
2. Trends in occupational distribution	
(a) Manpower trends in primary industries	
(b) Manpower trends in secondary industries	
(c) Manpower trends in tertiary industries	
3. Changes in sectoral labour products	
IV. Capital Formation	190
1. Approach and concepts	
2. Studies of capital formation in Hungary	
3. Gross Investment in Hungary, 1924/25 to 1949	
I. Statistical Methods	
A. The Inter-war Estimates	
Agriculture	
(a) Farm equipment	
(b) Farm buildings	
(c) Irrigation, drainage, reclamation and water regulation	
(d) Vineyards	
(e) Forests	
(f) Orchards	
(g) Manufacturing	
(h) Mining	
(i) Communications	
(j) Housing	
(k) Government	
B. The Post-war Estimates	
(a) 1947/48	
(b) August to December 1948	
(c) 1949	
C. Inventories	
II. Analysis of Investment Trends	
A. Capital Formation Between the Two Wars	
1. The investment in housing	
2. Capital formation in manufacturing	
3. Gross capital formation in agriculture and forestry	
4. Investment in transport and communications	
5. Government investment	
B. The Allocation of Investment during the Post-war Years	
4. National income and capital formation	

Notes on Income Growth and the Rate of Saving in Japan

A Brief Survey of the Recent Estimates made by Research Workers
at Hitotsubashi University

by YUZO YAMADA

	<i>page</i>
I. How High?	224
II. List of Recent Main Works	225
III. My Estimates of National Income	226
IV. Ohkawa's Estimate of National Product	228
V. Comparison of Mr. Colin Clark's Estimate with Ours	230
VI. Rate of Income Growth	231
VII. My Estimate of Savings	233
VIII. Ito's and Shiohara's Estimates of Savings	235
IX. Some Concluding Remarks	237
Appendix I. After the War	239
