

ANALYTICAL TABLE OF CONTENTS

1

On Econometric Models of the U.S. Economy

by *CARL F. CHRIST*

	<i>page</i>
I. Introduction	1
II. Tinbergen-Type Econometric Models	1
III. Dynamic Properties	3
IV. Testing Econometric Models	11
V. A Comparative Survey of Nine Tinbergen-Type Models	12
VI. List of References	21

2

The Reliability of the Policy Model used by the Central Planning Bureau of the Netherlands

by *J. LIPS and D. B. J. SCHOUTEN*

I. Introduction	24
II. The Method	25
III. Yardsticks of Reliability	27
IV. The Variables Chosen	31
V. Prices	31
VI. Volumes	35
VII. Taxes	39
VIII. Non-wage Income	42
IX. All Endogenous Variables	43
Appendix: The Model Used	48

3

Forecasting Bank Liquidity

by *PETTER JAKOB BJERVE*

I. Introduction	52
II. The Forecast for 1950	55
1. The model	
2. The estimation of data	
3. An appraisal of the forecast	

	<i>page</i>
III. The Forecast for 1952	63
1. The model	
2. The estimation of behaviour relationships	
3. The estimation of data	
4. The numerical results	
5. An appraisal of the forecast	
IV. Conclusion	75

4

Measurement and Interpretation of the Income
Distribution in the United States

by DOROTHY S. BRADY

I. Basic Assumptions	78
1. Common observation of thoughtful men	
2. The diffusion of well-being	
3. Responsibility for family support	
II. Statistical Theories	84
1. Income and economic status	
2. Similarities within income groups	
3. Variability within occupational groups	
4. Stability of individual incomes	
III. The Cost of Living	94
1. Variations in need	
2. Income and the consumer unit	

5

Changes in Danish Income Distribution 1939-52

by KJELD BJERKE

Introductory Remarks	98
I. The Statistical Basis	99
1. Taxable income	
2. Tax evasion	
3. The persons assessed	
II. The Income Distribution 1939, 1944, 1949 and 1952	104
1. Choice of years	
2. The income distribution for 1939	
3. Changes in the income distribution	

page

III. The Causes of the Changes in the Income Distribution for 1939, 1944, 1949 and 1952	111
1. Defects in the statistical material	
2. Changes in the industrial structure	
3. Re-distribution of income through fiscal policy	
4. Difference in increase in average incomes	
5. The levelling within the individual industries	
IV. Changes in the Distribution of Personal Wealth, 1939-1952	139
V. Concluding Remarks	143
Appendix: The Deviation in the Distributions of Income in the Individual Industries in 1939 and 1952	145
Addenda:	
A. Extract from the Income-Tax Return	149
B. The Distribution of Income-Tax Payers by Income Brackets, 1939, 1944, 1949 and 1952	151
C. The Distribution of Total Assessed Income by Income Brackets.	151
D. Average Assessed Income for the Individual Industries 1939, 1944, 1949 and 1952	152
E. The Distribution of Personal Wealth	154

6

Income Size Distribution Statistics and Research in Canada A Survey and Some Analysis

by *SIMON A. GOLDBERG and JENNY R. PODOLUK*

Introduction	155
I. Some Changes in Earnings from Paid Employment and other Comparisons	155
1. Introduction	
2. Some changes in wages and salaries of individual wage and salary earners	
(a) Changes in current dollars	
(b) Changes in constant dollars	
3. Some changes in wages and salaries of families whose head was a wage or salary earner	
(a) Changes in current dollars	
(b) Changes in constant dollars	
4. Miscellaneous remarks	
(a) Personal income	
(b) The influence of taxes	
(c) Personal disposable income and national income	
(d) Period of income change	

	<i>page</i>
Appendix to I	
Notes on sources and methods	171
A. Distribution of individual earnings, 1930-31	
B. Distribution of individual earnings, 1951	
C. Distribution of family earnings, 1930-31	
D. Distribution of family earnings, 1951	
II. Statistics and Research on Income Size - General Source Material	174
1. The census	
2. Taxation statistics	
3. Other general sources	
4. Miscellaneous nation-wide surveys and research on income size distribution in Canada	
(a) The Dominion Bureau of Statistics 1937-38 budget study	
(b) The 1942 'Read Study'	
(c) Dominion Bureau of Statistics 1947-48 budget study	
(d) The Canadian sickness survey	
5. The 1952 income survey - survey procedure and methods of constructing distributions	
(a) The questionnaire	
(b) Survey procedure	
(c) Response	
(d) Method of blow-up of sample distributions to national aggregates	
(e) Appraisal and adjustment of survey income figures	
(i) Comparison with national accounts aggregates	
(ii) Comparison with income tax data and use of latter in the distribution	
(f) Summary	
6. The 1952 Income Survey - some conceptual and methodological problems	
(a) Survey procedure employed - self-enumeration	
(b) The household and the definition of the family	
(c) The definition and adjustment of income	
(d) Exclusion of military and farm sector	
(e) Changes in family composition	
(f) Weighting and related problems	
7. Future plans	

7

Estimation of Income Distribution in Australia

by *H. P. BROWN*

	<i>page</i>
I. Introduction	202
II. General Aspects of Income Distribution	204

	<i>page</i>
III. Description of Estimated Income Distributions	209
IV. Characteristics of Income Distributions for 1942-43	213
V. An Inferiority Index	217

8

The Distribution of Household and Individual Income

by DOROTHY COLE and J. E. G. UTTING

I. General	239
1. Introduction	
2. Definition of income	
3. The nature of the income receiving unit and its definition	
4. The size of the receiving unit	
II. The Frequency and Characteristics of Multi-Earner and Multi-Income Receiving Units in Cambridgeshire	244
1. Definitions	
2. Numbers of incomes and earners	
3. The relative importance of different groups	
4. Factors influencing the formation of multi-earner households	
5. The life cycle of households	
6. Differences in the size of the receiving unit	
III. A Comparison of the Income Distribution for Different Receiving Units	257
IV. Some Theoretical Implications	261

9

Some Aspects of the Economic Interpretation of Changes in the Inequality of Income Distribution

by RAGNAR BENTZEL

I. Introduction	269
II. The Inequality of Income and the Inequality of Real Consumption	271
III. The Formal Analysis and the Theory of Consumption	274

Trends and Cycles in Norwegian Income Shares
by *ODD AUKRUST*

	<i>page</i>
I. 1. Distribution theory and national income statistics	283
2. Scope and method of the present study	
II. 1. Main changes in the distribution pattern since 1930	286
2. The overall wage fraction in ordinary business shows no strong upward trend	
3. The share of wages and inter-industrial shifts	
4. Effects of the relative increase in the number of employees	
III. 1. Business cycle pattern of the wage fraction	295
2. Cyclical movements originate in export industries	
3. Export industries and home market industries are different, also with respect to trend	
4. The different cyclical pattern of the wage share in home market industries and export industries within commodity production and transport	
IV. Main Findings	302
