Financial Accounting within a System of National Accounts
by *PETTER JAKOB BJERVE and MIKAEL SELSJORD*

	<i>Page</i>
I. Introduction	60
II. The Financial Accounts	61
1. General analysis	61
2. The accounting structure and accounting relationships	63
3. The drawing up of accounts	67
4. Sector classification	68
5. Classification of financial objects	70
6. Choice of evaluation principles	73
7. Problems of reconciling the accounts	75
III. Examples Illustrating Norwegian Financial Accounting	75
1. Sector classification	76
2. Classification of financial objects	77
3. Choice of evaluation principles	78
4. The accounting structure and the available statistics	78

4

Real Capital and Economic Growth in Norway 1900-56
by *ODD AUKRUST and JUUL BJERKE*

Introduction	80
I. Definition and Valuation Problems	80
The capital concept	81
The aggregation problem	81
The retrospective method	82
The prospective method	83
Comparison of the two methods	84
II. Computation Methods	87
Capital computations	87
Computation of employment data	91
III. Main Findings	91
The growth of the total volume of real capital	92
Capital structure by type	93
Real capital by industries	94
Relation between real capital, employment, and production	96
IV. The Capital-Output Ratio	98
The idea of a constant marginal capital-output ratio	98
The period 1900-39	99
The period 1946-56	101
V. Some Experiments in Fitting a Production Function to Data	103
Selecting the form of the function	103
Computation results	106
Conclusions	108
An economic interpretation of the computation results and their implications	110
Appendix of Tables	114

Problems and Uses of National Wealth Estimates in
Latin America

by *ALEXANDER GANZ*

	<i>Page</i>
I. Role and Importance of Estimates of National Wealth in Latin America	217
II. Some Significant Conclusions Based on the Analysis of the Stock of Capital in some Latin American Countries and in the Region as a whole	222
1. Long-term increase in the productivity of capital, and change in economic structure of the labour force, capital, and production	223
2. Significance with respect to problem and social cost of economic development	228
3. Factors contributing to the increase in the efficiency, utilization, and productivity of capital in Latin America in the last quarter century	231
4. Factors affecting adversely the efficiency, utilization, and productivity of fixed reproducible capital in Latin America	234
(a) Inefficient use of land resources	234
(b) Mis-utilization of public investment resources	236
5. Future outlook for Latin American economic growth, capital requirements, and capital productivity	240
6. Hypothesis with respect to the differences in the rate of increase and in the level of the product-capital ratio and the rate of economic growth of Argentina and Colombia	240
7. Capital formation, fixed reproducible capital, and economic growth in Argentina, 1900-55	242
8. Capital formation, fixed reproducible capital, and economic growth in Colombia, 1925-53	251
9. Investment priority: case of the Cauca Valley Authority of Colombia.	256
III. Problems of Data, Concept, and Method in the Estimation of the Stock of Fixed Reproducible Capital in Latin America	260
1. Problems of data concept and method	261
(a) Relative abundance of reliable data availabilities for estimating investment in constant prices, by type of good, and by economic sector	262
(b) The scarcity, incompleteness, and unreliability of census data, as well as its susceptibility to broad variation in reporting original cost and replacement cost, on account of the general inflation of prices	264
(c) The primary interest in analysing investment and capital data for implications with respect to the efficiency, degree of utilization, and productivity in the channelling of investment resources	265
(d) The convenience of carrying out basic research in investment and capital as an integral part of national income work	266

1. General analysis	61
2. The accounting structure and accounting relationships	63
3. The drawing up of accounts	67
4. Sector classification	68
5. Classification of financial objects	70
6. Choice of evaluation principles	73
7. Problems of reconciling the accounts	75
III. Examples Illustrating Norwegian Financial Accounting	75
1. Sector classification	76
2. Classification of financial objects	77
3. Choice of evaluation principles	78
4. The accounting structure and the available statistics	78

4

Real Capital and Economic Growth in Norway 1900-56

by *ODD AUKRUST and JUUL BJERKE*

Introduction	80
I. Definition and Valuation Problems	80
The capital concept	81
The aggregation problem	81
The retrospective method	82
The prospective method	83
Comparison of the two methods	84
II. Computation Methods	87
Capital computations	87
Computation of employment data	91
III. Main Findings	91
The growth of the total volume of real capital	92
Capital structure by type	93
Real capital by industries	94
Relation between real capital, employment, and production	96
IV. The Capital-Output Ratio	98
The idea of a constant marginal capital-output ratio	98
The period 1900-39	99
The period 1946-56	101
V. Some Experiments in Fitting a Production Function to Data	103
Selecting the form of the function	103
Computation results	106
Conclusions	108
An economic interpretation of the computation results and their implications	110
Appendix of Tables	114

The Preparation of a National Balance Sheet: Experience
in the Netherlands

*By the Division of National Accounts of the Netherlands
Central Bureau of Statistics*

	<i>Page</i>
Introduction	119
I. Basic Concepts and Definitions	121
1. The national balance sheet and the national accounts	121
2. The concept of capital goods	123
3. Valuation of assets and liabilities	124
4. Problems of allocation	125
II. Problems of Estimation	126
1. Some notes on statistical measurement	126
2. An estimate of the value of the Netherlands merchant fleet	130
3. An estimate of the value of all dwellings	134
4. An evaluation of the fixed assets of electricity works	135
5. The value of fixed assets in agriculture	137
6. Estimates of the value of agricultural land	139
III. Final Remarks	141
Appendix I. The system of the national balance sheet	143
Appendix II. National Wealth of the Netherlands on 31 December 1952	144
Appendix III. Bibliography	145

An Estimate of the National Capital Account of the
Federal German Republic

by FERDINAND GRÜNIG

I. Earlier Estimates of National Wealth	147
II. Principal Considerations Underlying the New Estimates	147
III. Methods of Computation	148
1. Housing	148
2. Manufacturing	149
IV. Estimates of Fixed Capital Assets of the Federal Republic	150
1. Gross values	151
2. Net-gross ratio	151
3. Net values	152
4. Distribution of capital assets by industry	153
5. Capital coefficients	154
V. 'Reproducible' Wealth of the Federal Republic	155

The National Wealth of Yugoslavia at the end of 1953

by *IVO VINSKI*

	<i>Page</i>
I. Historical Review	160
II. The Price-level Problem	162
III. The Capital-Income Ratio	164
IV. The Rate of Growth of Capital	165

Appendix I. National Wealth of Yugoslavia at the End of 1953	170
Appendix II. Methods and Sources	175
1. General approach	175
2. Manufacturing, mining, and electricity	177
3. Agriculture and fishing	179
4. Forestry and logging	182
5. Transport and communication	183
6. Construction	184
7. Commerce and hotels	184
8. Handicrafts and cottage industries	184
9. Residential buildings	185
10. Public utilities	187
11. Health and social security	188
12. Education, research, and art	188
13. Public administration	189
14. Consumer durables and non-durables	189
15. Land	190
16. Net foreign assets	191

Canada's Reproducible Wealth

by *ANTHONY SCOTT*

I. Scope of the Study	193
1. Introduction	193
2. Concept and method of presentation	194
II. Notes, Sources, and Methods	197
1. Structures	197
2. Equipment	201
3. Livestock	205
4. Inventories	205
5. Monetary metals	210
6. Net foreign assets	210
7. Natural resources	212
III. Analysis of Findings	214

Problems and Uses of National Wealth Estimates in
Latin America

by *ALEXANDER GANZ*

Fixed Reproducible Capital in Argentina, 1935-55

by *MANUEL BALBOA and ALBERTO FRACCHIA*

I. Introduction	274
II. Statistical Data Available in Argentina for Estimating Fixed Reproducible Capital	275
III. Estimate of Fixed Reproducible Capital by the Accumulation of Depreciated Investment	277
IV. Estimate of Gross Fixed Investment	278
V. Estimate of Capital Consumption	280
VI. Estimate of Fixed Reproducible Capital by Types of Capital Goods and Economic Sector Allocation	284
VII. Conclusions	286

11

Capital Accumulation and Economic Growth in
South Africaby *D. G. FRANZSEN and J. J. D. WILLERS*

I. Capital Accumulation During the Pre-union Period	293
II. Capital Accumulation During the Post-union Period	299
1. Methods of calculation	
2. The pattern of growth of the national capital stock	302
(a) The rate of growth of the capital stock	303
(b) The relation between capital stock and real income	304
(c) Capital coefficients of individual industries	307
(d) The composition of the capital stock	308
(e) Additions to the capital stock	310
Appendix I. Tables	312
Appendix II. Notes on Sources of Information about Capital Accumulation	318
Appendix III. Summary Table of National Wealth	322

The National Wealth of Australia

by J. M. GARLAND and R. W. GOLDSMITH

	<i>Page</i>
I. Previous Estimates	323
II. Scope and Method of Present Estimates	325
III. Reproducible Tangible Assets	328
1. Methods of estimation	328
2. Sources of data	329
3. Quality of data	331
4. The estimates	332
IV. Non-reproducible Tangible Assets	332
V. International Assets and Liabilities	340
VI. National Wealth: Aggregate Estimates	344
VII. National Wealth: Some Interpretations	346
1. The growth of national wealth	346
2. Gross <i>v.</i> net wealth	353
3. The structure of national wealth	355
4. Wealth-income ratios	358
Appendix: Reproducible Tangible Assets. Notes on the Estimation of the Expenditure Series and the Price Indexes	361

An Estimate of the Tangible Wealth of India

by M. MUKHERJEE and N. S. R. SASTRY

I. The Estimates	365
II. Method of Estimation	365
III. Estimates Based on Surveys	367
IV. Estimates Based on Investment Cost Index and Series of Paid-up Capital	372
V. Estimates Based on Series of Capital Expenditures and Investment Cost Index	380
VI. Estimates Based on Adjustment of Accumulated Expenditures	380
VII. Estimates Based on Miscellaneous Methods	383
VIII. Capital-Output Ratios	386
